(LISTED BELOW)

DATE OF
INFO.

SUPPLEMENT TO
REPORT NO.

1. Tests with two rocket gliders were carried out in Vrsac between 25 and 30 April 1950. Two pairs of rockets were mounted on the body or under the wing of each glider. According to official reports the tests were very successful. Reportedly, these rockets may replace the present methods of glider takeoffs by means of towing or catapulting.
2. These rockets are being manufactured in the Zorka factory in Sabac, while the factory in Kacarevo only produces rocket parts. The following Czechoslovak technicians who serve with the Yugoslav Air Corps, are employed in Kacarevo: Jan Zaminek, Pribin Mohacek and Vreslav Martin.

This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 16 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States.
